

UTILISAVE’S EXPERTISE IN THE MANUFACTURING INDUSTRY RESULTS IN \$795,985 IN SAVINGS

CLIENT PROFILE

This UtiliSave client is a large, multi-billion dollar food manufacturing company with hundreds of locations spanning across the United States. Believing that there were errors and overcharges on their utility bills, the client engaged UtiliSave’s utility auditing services to investigate their concerns. With 30+ years of experience and a proven history of success working with the manufacturing industry, UtiliSave was able to produce exceptional results.

THE PROCESS

Upon careful analysis of the client’s utility and billing data, our auditors quickly identified a tax issue that was costing the client hundreds of thousands of dollars.

Certain groups and industries qualify for a certain tax exemption—and not just sales tax. As a manufacturer, our client qualifies for certain types of these exemption as well, though this is a lesser known fact that not many are aware of. UtiliSave, having extensive experience working with clients in the manufacturing industry, knew that manufacturers do, in fact, qualify for these particular tax-exemptions.

THE RESULTS

Upon identifying this issue, our auditors procured the required paperwork and went directly to our client’s utility company. We were able to obtain a four-year retroactive refund totaling **\$751,020**. This highlights a key difference that sets UtiliSave apart from other firms who offer utility auditing services. Our ability to not only retroactively audit old bills but also to obtain refunds for these old bills create unparalleled results.

Having resolved this tax error, our client will be saving \$170,000 annually moving forward. To date, UtiliSave has obtained \$795,985 in refunds for this client.
