

UTILISAVE SECURES \$2,000,000 REFUND FOR CLIENT

CLIENT PROFILE

This UtiliSave client is a full-service hospital system in Brooklyn, New York with 530 beds and over 50 specialty clinics. As a non-profit 501-c organization, their primary and secondary service areas comprise 1 million Brooklyn residents.

THE PROCESS

UtiliSave works with the understanding that there is real value in big data.

Unlike typical energy consultants, our auditors go the extra mile to gain a clear picture of our client’s individual needs. Our auditors will often conduct a series of on-site inspections of indicators of energy use to record and review everything they see.

UtiliSave also conducts a BillAudit™, which uses a rigorous data analysis system powered by our in-house proprietary software to perform a comprehensive utility data audit. UtiliSave’s proprietary software applies intricate algorithms to scrub, parse, and analyze massive amounts of data and identify savings opportunities. This audit is done on a consistent basis so UtiliSave can stay on top of irregular billing, data anomalies, and savings opportunities.

THE RESULTS

UtiliSave was able to obtain a \$2,000,000 refund for this client by identifying a key savings opportunity. Our auditors noticed that with the client’s current ESCO was charging them an unduly high rate that exceeded the rate specified on their contract. UtiliSave took action on this issue and was able to reduce the cost by half.

UtiliSave was able to obtain a \$2,000,000 refund for this client by identifying a key savings opportunity.
