

UTILISAVE’S SUPERIOR AUDITS

UtiliSave Finds Savings for Seven Clients Where Procurement Companies Did Not

VS

PROCUREMENT AUDIT VS. UTILISAVE AUDIT

If you are a large energy consumer, procurement of electric and gas should be on the top of your “to do” list, especially if you are doing business in a deregulated market. Many consumers use the same procurement company to audit their energy bills. This choice may seem convenient, however, consumers risk not uncovering opportunities in the procurement process or missing out on savings and refunds from other utilities such as water and sewer.

While many procurement companies provide utility bill auditing as an add-on service, UtiliSave auditors identify uncommon errors, root out opportunities for rate changes, and focus on exemptions and/or modifications of surcharges and certain taxes. UtiliSave’s combination of an advanced technology platform with an experienced staff that has a deep knowledge of the rules, regulations, tariffs, taxes and applicable legislation makes all the difference.

Secured Savings and Returns

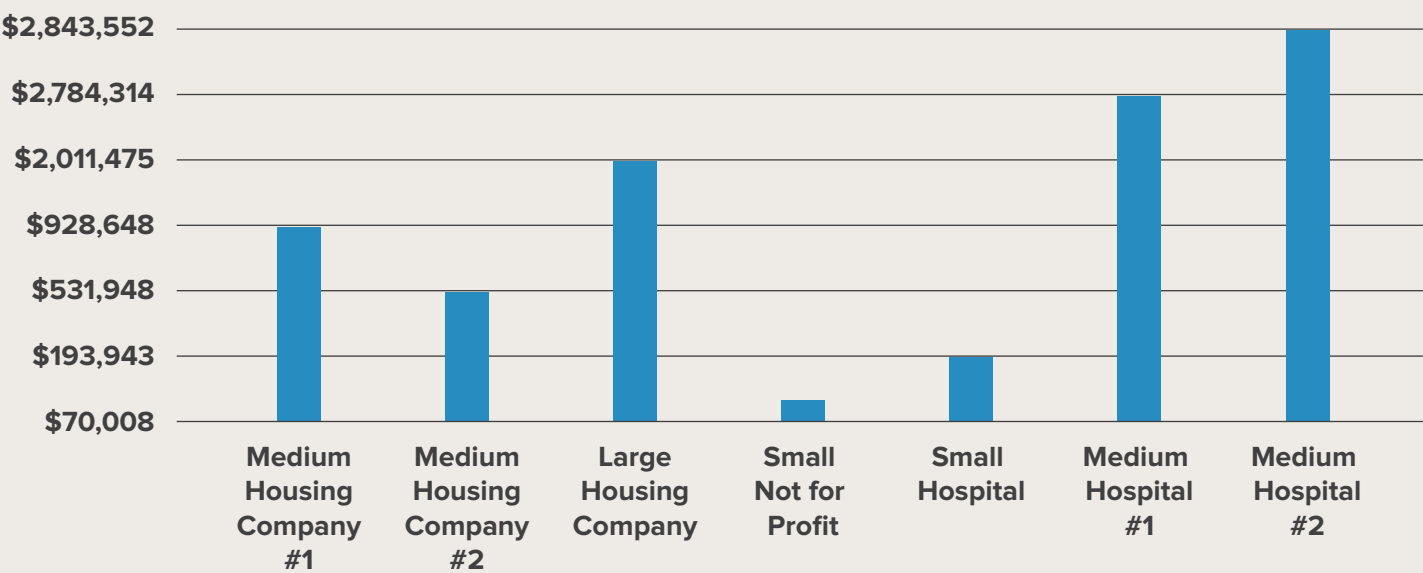

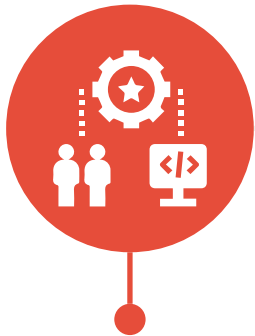

Figure 1

Figure 1 reflects seven of UtiliSave’s clients who first went with their procurement company to audit their utility bills. In each case, zero refunds and savings were secured by them.

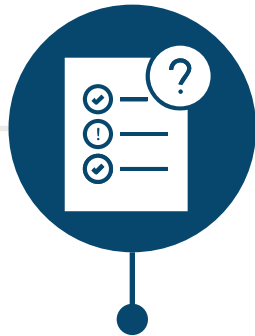

The same clients were re-audited by UtiliSave which resulted in the uncovering of significant savings, highlighting the importance of leveraging a specialist in forensic utility bill audits.

NOT JUST ANY ONE CAN DO IT

A forensic utility bill audit that produces noteworthy results requires meticulous analysis. An extensive infrastructure is needed to support the continuous collection of billing data, on both a monthly and an interval recording schedule (readings every 15 minutes). One interval data bill can provide data equivalent to 3,000 utility bills. A professional and extensive data collection operation is critical in conducting a deep and extensive audit.

There are a myriad of issues related to billing data that can result in over-billing. Are the meters working properly? Are they collecting and reporting the data to the system properly? Is the data from your meters being accurately interpolated into the actual utility billing? An error in anyone of these processes can result in significant billing issues.

THE ULTIMATE DIFFERENCE

The depth of knowledge and combined years of experience of UtiliSave’s infrastructure and staff is the material difference that results in the savings and refunds consistently secured. These competitive advantages are the drivers of UtiliSave’s auditing success and each factor contributes to a successful forensic auditing assignment.

A UtiliSave audit is not a one-time event, but rather an on-going process that brings money back to our clients each year. All of our efforts are focused on delivering the most net dollars and our demonstrated results reflect that.

WE CAN PROVE IT

Ask us for actual savings reports and case studies of success.

An industry leader in utility data optimization since 1991.

More than **\$700M+** in hard-dollar savings and refunds recovered.

Provides core services to over **16,000** properties nationwide.

Proprietary software dives deeper to deliver **larger net returns.**

Experience in **475+** tariff jurisdictions nationwide.
