

UTILISAVE FINDS \$17.549 MILLION IN ENERGY AND WATER SAVINGS

COMPANY AND CASE PROFILE

One of the most prestigious University Hospitals in the world engaged UtiliSave for auditing services to analyze their electric, gas, and oil accounts enterprise-wide after suspecting errors in their billings. Due to their exceptional results in energy, UtiliSave was granted the hospital’s water accounts which had been previously audited by a different auditing firm.

Combining UtiliSave’s auditing software and intellectual capital, significant and unique savings opportunities were uncovered for the client. UtiliSave’s in-depth knowledge of utility tariffs and government programs contributed to additional savings in electric, oil and gas utilities.

UtiliSave’s product, BillAudit™, analyzed the complex data sets generated by the utility company, and through our intricate analysis, we identified refunds in all accounts which produced large returns.

THE VALUE IN OUR SOLUTION

Out of the gate, UtiliSave identified errors that produced a refund of **\$350,000** not once, but twice for two single months’ bills where the utility company overcharged for demand and the readings for which the utility company recorded as “actual.”

In reviewing this hospital’s demand billing, UtiliSave compared the maximum demand for the period to the “actual” demand billed by the utility. By calculating what the appropriate demand should have been, UtiliSave then submitted a claim to the utility company with their findings. The utility company concurred with UtiliSave’s analysis and adjusted the account by issuing a refund of **\$350,000** for each month that the error was identified for.

SOLID SAVINGS IN THE WATER

More than six years of water/sewer utility data was collected and analyzed through UtiliSave’s auditing software. Within only two months of UtiliSave’s engagement with the client for water bill auditing, UtiliSave identified a significant issue and submitted a claim to the water provider. Initially denying the claim and UtiliSave’s suggested course of action, UtiliSave supported the hospital with persistence and comprehensive data. UtiliSave appealed the matter and the water provider eventually concurred with our findings. The water provider corrected our client’s billing for a two year period, resulting in a **\$195,000** credit.

In the first full year of UtiliSave’s engagement, over **\$815,000** in water savings alone was secured, even after discount auditing firms had reviewed their accounts and uncovered nothing.

Results to Date:

UtiliSave saved this hospital over \$10 million in electric utility costs and over \$7 million in water/sewer savings—resulting in over \$17 million in savings to date.

YEAR TO DATE SAVINGS REPORT FOR THIS CUSTOMER

 Year	 Water/Sewer	 Electric, Gas, Oil & Steam	 Total
Total to Date	\$7,522,428	\$10,026,929	\$17,549,357
