SIX BUILDINGS. SIGNIFICANT SAVINGS.

UtiliSave audits **6 buildings owned by this non-profit organization**. Based on our knowledge of utility tariffs and tax regulations, we identified exemptions based on the organization's legal status and unique building usage — exemptions the utility had not proactively applied.

Using rate modeling software, UtiliSave identified a more beneficial rate for the delivery portion of their electric billing based on the client's specific load profile — producing ongoing annual savings that continue indefinitely after implementation.

Key Insight: The right utility rate depends entirely on how your organization uses energy. UtiliSave matches your load profile to the optimal available tariff — a service your utility will never volunteer.

TURNING LEGAL STATUS INTO SAVINGS

Non-profit status provides access to utility programs, tax exemptions, and rate classifications unavailable to for-profit organizations. UtiliSave's **non-profit practice specialists** have secured millions in exemption-based savings for mission-driven organizations nationwide.

For this client, we prepared and submitted all required documentation to secure applicable exemptions — a process requiring deep knowledge of both utility regulations and non-profit law, handled by UtiliSave at no upfront cost.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
