THE UTILISAVE R&D ADVANTAGE

UtiliSave's dedicated R&D team continuously studies complex utility tariffs, public service laws, and government savings programs — identifying facilities qualifying for **special discount programs offered by particular utilities** that are not widely publicized and require expert navigation to access.

For this manufacturing client, UtiliSave prepared extensive documentation, successfully negotiated program implementation, and delivered **significant annual savings** — with Year 5 producing \$356,640 on an annual spend of \$1.83M.

Key Insight: UtiliSave's continuous R&D investment in tariff knowledge means clients access savings programs that other auditors — and the utilities themselves — never bring to a client's attention.

MANUFACTURING-SPECIFIC EXPERTISE

Manufacturing facilities have unique utility profiles: high-demand loads, process-specific consumption, complex power factor considerations, and specialized equipment qualifying for **industry-specific exemptions**. UtiliSave's industrial team is trained specifically for this sector.

Beyond the discount program, UtiliSave identified billing errors including demand charge miscalculations, incorrect rate classifications, and applicable manufacturing exemptions — each contributing to the cumulative \$1.35M in savings over 5 years.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
