ON-SITE INSPECTION FINDS WHAT SOFTWARE MISSES

For this manufacturing client, UtiliSave conducted comprehensive **physical inspections combined with statistical analysis** of historical billing — identifying savings from double billing, incorrect consumption calculations, and meter multiplier errors spanning multiple years.

The Year 8 recovery of \$131,136 is a direct result of on-site inspections identifying a critical metering discrepancy generating overbilling for multiple years. **Physical presence — not just software** — is what uncovered this error and secured the full retroactive refund.

Key Insight: Software alone cannot catch every billing error. UtiliSave's on-site inspection program identifies meter configuration issues and equipment classifications invisible to remote analysis.

MANUFACTURING EXEMPTION RECOVERY

UtiliSave identified **special exemptions justified by the client's manufacturing status** under applicable utility tariffs and state regulations. Manufacturing facilities are entitled to exemptions from certain surcharges — but only if properly documented, applied, and enforced.

We prepared all necessary documentation, submitted exemption applications, and negotiated with the utility to secure retroactive application — resulting in a permanent reduction in annual surcharge burden plus full retroactive refund with interest.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
