CONNECTED LOAD STUDY: EQUIPMENT BY EQUIPMENT

UtiliSave conducted a comprehensive **connected load study** of every piece of equipment and machinery in this manufacturing facility — analyzing actual electrical draw to qualify the client for a significant manufacturing exemption under applicable utility tariff provisions.

This meticulous equipment-by-equipment analysis is a UtiliSave specialty that most auditors skip entirely. The result: qualification for exemptions reducing ongoing utility costs and triggering a retroactive refund covering multiple prior billing periods.

Key Insight: By documenting every machine, UtiliSave builds the strongest possible case for maximum exemption qualification — thoroughness that generalist auditors simply do not provide.

STATE REFUND PROGRAM SUCCESS

UtiliSave prepared the extensive documentation required to pursue a **State-issued refund program** for manufacturers in this client's jurisdiction — a process requiring detailed knowledge of eligibility, procedures, and regulatory timelines most consultants do not possess.

UtiliSave successfully secured the State-issued refund for the client. This program is available to qualified manufacturers in multiple states — contact UtiliSave to determine if your facility qualifies.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
