RATE MODELING FOR COMPLEX LTC LOADS

Using rate modeling software, UtiliSave analyzed this client's **operations and demand patterns by facility and account**, identifying more beneficial rate methods for the delivery portion of their facilities' electric billing — producing savings in each of 14 consecutive years.

This client benefitted from UtiliSave's dedicated R&D group, which developed a successful legal argument securing a **partial exemption of a surcharge levied by both the regulated utility and the deregulated marketer**.

Key Insight: UtiliSave's R&D team identified a legal basis for exemption no other auditor had found for this client type — research-driven legal strategy, not just software.

MULTIPLIER ERRORS & DEMAND RECOVERY

UtiliSave's auditing software identified billing errors including **multiplier errors, demand billing errors, overlapping billing periods, and incorrect fiscal rates** — a comprehensive set of recoverable overcharges producing substantial refunds.

UtiliSave also secured applicable tax exemptions under state and federal regulations. Long-term care facilities have unique regulatory profiles creating exemption opportunities not available to other commercial users.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
