ENTERPRISE-WIDE FORENSIC AUDITING

For 11+ consecutive years, UtiliSave delivered forensic utility auditing to this University Hospital system — encompassing **3 major campuses and over 350 utility accounts**. We partnered directly with the Hospital's Energy Programs Director to map every utility relationship across the enterprise.

Our proprietary software deconstructed each billing account to analyze individual surcharges and rate components, validated line-by-line by technical specialists — producing unique exemptions and allowances delivering consistent savings across water/sewer, electric, gas, and oil.

Key Insight: UtiliSave's multi-account platform excels in large hospital systems — the more accounts in your portfolio, the more recovery opportunities our software uncovers simultaneously.

15-MINUTE INTERVAL DATA ANALYSIS

For this client's electric accounts, UtiliSave analyzed billing data at **15-minute intervals** — the most granular level available — resulting in six-figure savings opportunities that cruder analysis methods miss entirely.

UtiliSave discovered that a commodity energy marketer had **updated its billing system mid-contract**, applying higher formulas than the original contract specified. We replicated the calculations, verified the overcharges, and recovered the full amount plus applicable interest.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to full resolution.
