10 FACILITIES. MILLIONS RECOVERED.

UtiliSave was engaged by this Federal Agency to audit **10 facilities**. Each facility's historical utility data was subjected to comprehensive tests identifying double bills, overlapping billing cycles, multiplier errors, erroneous consumption, high demand charges, and incorrect fiscal rates.

Meters at **2 facilities had been overbilled for 2-4 consecutive years**. UtiliSave recovered the full value. Year 1 alone delivered **\$1.46M** — proving that retroactive forensic analysis pays for itself many times over from day one.

Key Insight: Year 1 delivered **\$1.46M** — the first year of a UtiliSave engagement typically produces the highest yield as accumulated historical overcharges surface immediately.

GOVERNMENT-SPECIFIC EXEMPTIONS

UtiliSave implemented **water consumption allowances that reduced this client's water billing by 54%** — a government-specific program the agency was entitled to but had never been receiving prior to UtiliSave's engagement.

Using our knowledge of government tariffs and regulatory frameworks, we secured hundreds of thousands in rate-based savings in addition to retroactive refunds — permanently reducing the agency's annual utility operating costs.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to its full legal conclusion.
