Verified hard-dollar refunds & ongoing savings across 7 continuous years of service

WHAT THE PRIOR AUDITOR MISSED

This client's accounts had been previously audited by another firm. UtiliSave employed its methodology using **site inspections and metering analysis** to understand the client's utility configuration — an approach the prior auditor had not taken.

Within two months of engagement, UtiliSave discovered **meter multiplier errors and incorrect consumption and demand billing** originating in periods previously reviewed and missed by the other firm. Year 2's \$53,277 reflected all accumulated prior-period overcharges plus interest.

Key Insight: 94% of the time, UtiliSave finds recoverable savings even after another auditor has reviewed the same accounts. A second opinion from UtiliSave costs you nothing.

7 YEARS OF CONTINUOUS DISCOVERY

UtiliSave continued periodic audits throughout the engagement, identifying additional savings year after year — demonstrating the value of **ongoing vigilance** rather than one-time review for public-sector utility portfolios.

Our audit process extended to rate structure optimization, identification of applicable government exemptions, and verification of meter configurations — delivering a comprehensive savings program that protects the client's utility budget indefinitely.

Legal Support Included: When utilities resist legitimate claims, UtiliSave engages specialized utility counsel at no additional cost — ensuring every recoverable dollar is pursued to resolution.
